

## CTM Manual Changing Table

### Change Tables & Shower Trolleys

---

As overhead hoists become more popular, many people find themselves buying electric height-adjustable changing tables just to move the stretcher bed to different heights for different carers. Where an overhead hoist is installed, or a mobile hoist is used, the CTM Manual Changing Table allows the bed to be set at the right height for each carer - vital to avoid secondary or frontline back injury - at around half the price of an equivalent electric changing table.

#### Technical Specifications

**Height:** 790 - 1090mm

**Depth:** 840mm

**Range of sizes:** up to 1900mm x 700mm

**Weight Capacity:** 112kg

Rustproof stainless steel frame

Fold away to 180mm thick

Special sizes available to order

#### Features
