

Quick Move

Standing and Transfer Equipment

The Quick Move is a safe and easy-to-use aid for sit-to-stand and transfer of users with impaired balance and reduced lower limb strength. Quick Move supports the user when rising, using their own strength. It then transfers the user, either standing or sitting from the bed to chair or wheelchair or to and from the toilet. Quick move is an excellent transfer aid which spares the backs of the caregivers and reduces the risk of work related injuries.

Technical Specifications

SWL: 170kg

Material: Powder coated Steel

Length: 98cm

Width: 60.5cm

Height: 112cm

Base width: 51 – 90cm

Castor size: 75mm radius

Weight: 35kg
