

Single Stud Wall Bracket

Rail Systems & Accessories

Used as an alternative to ceiling mounting, the Single Stud Wall Bracket can be fixed directly into cement panel, timber stud and other approved supports capable of the required point load. When installed, this wall mount system offers the same stability as ceiling installations, with a slim profile. Suitable for use with Slimline rail.

Technical Specifications

SWL: 450kg

Features

- Alternative to ceiling mounting
- Can be mounted at any required height

Product Code: LWB02
