

Wall Post System

Rail Systems & Accessories

Used as an alternative to ceiling mounting, the Wall Post System comes complete with all hardware and can be attached directly into dry-wall, provided that it is at least 10mm thick. Quickly installed the wall mount system offers the same stability as ceiling installations. Rails may be run at angles up to 45°. Suits all rail types and includes skirting board offsets. SWL of 450kg.

Technical Specifications
