

Carlo Eco Classic (185kg)

Standing and Transfer Equipment

The Carlo Eco Classic mobile hoist has been specifically designed for the day to day patient moving and handling transfers performed within Long Term Care environments. The aluminium and stainless steel design makes it ideal for use in wet room and bathroom environments and incredibly lightweight hence easy to manoeuvre. The smooth movement is assisted by the castors designed to avoid clogging from carpet fibres and debris. The Carlo lifting arm is arched and longer than many hoist arms, allowing easier patient handling. This combined with powered spreadable legs allows the hoist to be positioned closer to a bed or chair for added comfort for the patient and easier handling for the carer. It also enables a patient to be lifted from the floor in the event of a fall

Technical Specifications

- Carrier frame: 1290mm x 125mm (L x H)
- Inner width: 540mm x 1040mm (closed)
- Outer width: 700mm x 1180mm (closed)
- SWL: 185kg
- Lifting Range: 1400mm

Features

- 2-point sling spreader bar can be lowered to the floor
- Large choice of comfortable loop slings of different sizes
- Electrical height adjustment and electrically spreadable carrier frame
- High-quality lockable double castors
- Large choice of comfortable loop slings of different sizes
