

L9000 Portable Free Standing Frame

L9000 Portable Free Standing Frame

Free Standing Systems

Designed for temporary or short term use only, our Portable Free Standing Frame may be used in conjunction with our portable or fixed ceiling hoists. Available with the option of a 2, 3, 4, or 6 metre length rail span, this versatile system is ideal for those situations where a rail installation is not feasible. This Free-Standing frame is height adjustable and has a safe working load of 200kg. Long term users should use CHS Healthcare's heavy duty custom gantry system or install a rail to the building structure. Available for hire or purchase.
