

## Silvalea Parasilk Sling

### Slings

The Silvalea Parasilk Straight Sling is a fully body supportive sling that is used for general transfers. The sling is made out of fine, soft parasilk fabric, allowing the sling to slide smoothly under the patient. This soft fabric also prevents pressure areas, making it suitable for patients with sensitive skin conditions. This sling comes in a navy blue colour and is available in sizes ranging from XS- XL.

### Technical Specifications

- SWL: 160kg
- Sizes available: XS - XL
