

Standing Transfer Sling Slings

Available in fabric only, the Standing Transfer Sling is padded and supportive, allowing superior access to remove clothing for toileting purposes. Designed to support patients from the waist level to mid shoulder whilst allowing free movement of the arms, so that the patient’s hand can reach naturally to grip the lift arms as they rise. The torso band is available with Buckle fastening or Velcro fastening and prevents the sling from riding up the patient’s back. Available in medium, large and extra-large. Option of Loop or Keyhole mount.
