

ADULT CHANGE TABLE

ELEVAND ADULT CHANGE TABLE

The Elevand Adult Change Table is designed and manufactured in Australia for use in schools, disabled accommodations, sports facilities, and special needs centers. It features a full-sized table top that is spacious enough for most patients. With a minimum height of less than 500mm, clients can transfer to the table independently, from a wheelchair, or with a hoist, thanks to the 155mm clearance below the frame. Caregivers can adjust the height up to 950mm using the foot control for optimal working conditions. Optional generously upholstered cot sides and ends provide additional client security. The table is equipped with four individually braked wheels for easy movement without compromising stability, and one wheel includes a directional locking brake for better control. There is no Australian GST payable on Change Tables.
