

CUSTOM GANTRY SYSTEM

The Elevand Custom Gantry System is designed and built specifically to meet your requirements. It is constructed of heavy-wall RHS steel and finished with a white powder coat for long-term use. This system is available with spans up to 6 meters and safe working loads up to 285 kilograms. The heavy framework and welded construction minimize movement typically found in other gantry systems. It is suitable for both fixed and portable hoist units.

FEATURES

- Suitable for heritage listed homes
- Ideal for rental properties
- Perfect for apartment buildings
- Applicable for temporary dwellings
- Appropriate for schools
